## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lander [US 4,476,469].

Regarding claims 1-2: Lander discloses a system for locating lost or misplaced items, comprising: -a transmitter unit (2) for attachment to the item to be located; the transmitting unit including a light emitting diode (132) and an emitting audible sound signal (130), and a DC power source (battery 22) [see Fig. 1-4, col. 3, lines 22-29 and 60-65],

-a pager unit (50) for mounting to a wall surface, having a manually operable push button (52) that upon actuation transmits a signal to the transmitter unit (2) thereby activating the light emitting diode and the audible sound signal so that the item can be located [as shown in Fig. 6, col. 4, lines 67-68 and col. 5, lines 1-20]. It would have been obvious to implement the sound emitter using a buzzer or speaker.

### ***Response to Arguments***

3. Applicant's arguments filed 12/19/05 have been fully considered but they are not persuasive.

Applicant argued, Applicant's system doesn't require a particular address signal arrangement and pulse position modulation form of the RF frequency as taught by Lander.

Art Unit: 2632

Examiner responds, Lander discloses or renders obvious all the limitations as Applicant claimed, such as transmitter (bleeper) including buzzer and light emitting diode, and a pager including a button to transmit a signal to the transmitter of the misplaced item. Therefore, without limiting the claimed invention to exclude Lander's operating detail such as, particular address, pulse position modulation and etc., the reference still firmly read in the claims as shown in the rejection above.

***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
